

Happy New Year from the CS-VUE Team

- To view this email online [click here](#)

Hello CS-VUE Subscriber,

The CS-VUE team would like to wish you a happy and productive year ahead.

In this issue we would like to welcome new clients, announce our latest product enhancements, and re-cap key events in 2008.

In this issue

WELCOME ABOARD

This month we welcome the following organisations to the CS-VUE community:

- Landcorp Farming Ltd
- Queensland Water Infrastructure Pty Ltd
- Envirowaste

We are pleased to have you on board and are looking forward to working with you to implement CS-VUE over the new year!

MESSAGE FROM CEO

So far 2009 has delivered so many global economic crunches, meltdowns and crises, we can't remember what the 'bad news de jour' is any more.

Rather than focus on the negative, it's time to reflect on the successes of 2008 and give you a peek at what 2009 has in store.

Last year CS-VUE added 20+ new clients, entered 50,000 additional permits, hired six new staff, and in consultation with clients, implemented 32 new enhancements to the system, including:

- Compliance Dashboard
- Projects Tab
- Projects by Condition
- Rich Text Field Editor
- Un-Snooze Condition
- Permit Map Reference Locator
- Contracts Module

- Client-side Administrators Module

In fact CS-VUE now holds the single largest database of resource consents in New Zealand, with more than 150,000 permit records in total!

This year we have many more enhancements on the roadmap. Planning for a new broader product version (CS-VUE 2.0) is well underway, which means that users will enjoy a vastly increased scope of corporate online sustainability tools and other goodies - think: free nationwide consent searches, GIS integration, carbon footprinting and online environmental management!

We will also continue with expansion into the Australian market - although this will be more of a 'tiptoe through the daisies' approach rather than 'full steam ahead'.

To all our clients, have a great year and feel free to [contact me](#) if you have any queries or comments.

Duncan Stewart - CEO

CS-VUE UPDATES - CLIENT SIDE ADMINISTRATOR TAB

This module is optional and will allow the product champion at your organisation to:

- create new user logins
- edit existing logins and passwords
- assign user rights
- turn on / off / schedule individuals' email alerts
- forward email alerts
- handover responsibility
- restrict a users access to either selected consents, or selected projects of consents

To find out more about the client side administrator tab, please get in touch with our [support team](#).

ANDREW.STEWART GROUP UPDATE

After a lengthy process involving extensive public consultation [Andrew.Stewart](#) has finally gained resource consent for the Waitakere City Council for the Cycle ways and walkways, Upper Opanuku Stream, Henderson Valley. This massive project weaves through approximately 5k through residential and reserve land following the Opanuku stream.

The [CarbonGroup Investment](#) team is rapidly ramping up its portfolio in 2009, with 2 new exciting international technologies added in January alone! In addition to high-efficiency industrial freezing technology in South America, CGI is also seeking to arrange partnerships and investment funding for new CO2 sequestration technology which also produces cashflow positive potable water and by-products.

[^ Top](#)

CS-VUE SUPPORT

CS-VUE continually innovates!

If you have any suggestions about future enhancements or improvements, [please let us know](#).

Our technical team will review all development ideas, and as always, we roll-out product updates to all of the CS-VUE community - meaning everyone benefits.
